

JEREMY BERNSDORFF

IT OPERATIONS | TIER 2 TECHNICAL SUPPORT | ENDPOINT & MICROSOFT 365 OPERATIONS

Brigham City, UT | 253.232.0646 | jpachoulli@gmail.com | jeremybernsdorff.com

PROFESSIONAL PROFILE

IT operations and Tier 2 technical support professional with 10+ years of enterprise support experience across distributed sites, research and development environments, business-critical applications, endpoints, hardware, and network connectivity. Background includes ServiceNow/ITSM incident management, Active Directory user administration, imaging and deployment, site/network installation, technical documentation, hardware lifecycle management, and license-managed engineering applications. Current hands-on Microsoft 365 Business Premium lab work extends into Windows Server 2025, AD DS/DNS, Microsoft Entra ID, Entra Connect, hybrid device identity, Intune enrollment/compliance/configuration, PowerShell policy, SmartScreen, and end-to-end troubleshooting.

CORE CAPABILITIES

OPERATIONS & SUPPORT

- Tier 2 Support
- IT Operations
- Incident / Request Management
- ServiceNow / ITSM
- SLA-driven troubleshooting

ENDPOINT & INFRASTRUCTURE

- Windows 10/11
- Windows Server 2025 Lab
- VMware Workstation
- Hardware / Imaging / Deployment
- DNS / TCP-IP / Network Support

MICROSOFT PLATFORM

- Microsoft 365 Admin Center
- Microsoft Entra ID / Entra Connect
- Microsoft Intune / MDM
- Active Directory / Group Policy
- PowerShell Administration Lab

TECHNICAL DEVELOPMENT

MICROSOFT 365 BUSINESS PREMIUM HYBRID ADMINISTRATION LAB | Independent Hands-On Lab | 2026 - Present

Portfolio documentation: jeremybernsdorff.com

- Built a VMware-based hybrid lab with two Windows Server 2025 systems and four Windows 11 clients; configured a bbo.test Active Directory forest, AD DS/DNS, static server networking, domain joins, users, groups, and administrative queries.
- Deployed Microsoft Entra Connect on a second server, aligned public UPNs with broadbandops.com, synchronized identities, configured hybrid device registration, and verified on-premises versus cloud identity states.
- Enrolled Windows clients into Microsoft Intune and created/assigned endpoint compliance and configuration policies for firewall, TPM, Defender/antimalware, SmartScreen, and PowerShell script execution (RemoteSigned behavior).
- Validated manual and background MDM synchronization, monitored asynchronous cloud-side policy evaluation, and verified successful policy deployment across managed endpoints.
- Troubleshot real lab failures including CN-versus-OU distinguished-name syntax, domain-join credential errors, Entra Connect authentication hangs, BitLocker-blocked Sysprep, transient Intune sync states, and policy targeting mistakes; documented cause, corrective action, validation, and operational lesson.

PROFESSIONAL EXPERIENCE

Plant Technician | Procter & Gamble | Bear River City, UT

Jul 2026 - Present

- Operate and monitor high-speed converting/packing processes from computer-controlled production systems; respond to equipment and process conditions while maintaining safety, quality, and production continuity.
- Perform preventive maintenance and first-line troubleshooting, follow standardized procedures, maintain production records, and coordinate during start-ups, line changes, troubleshooting events, and shift transitions.

Material Associate | Autoliv | Brigham City, UT

Sep 2022 - Apr 2026

- Maintained accurate, time-sensitive material flow supporting continuous production in a high-volume manufacturing environment; coordinated across teams and adapted to changing priorities.
- Supported safe, organized work areas and reliable handoffs across shifts and production functions while following standardized operating procedures.

PROFESSIONAL EXPERIENCE - CONTINUED

IT Field Technician (Contract) | TEKsystems | Issaquah, WA

2019 - 2020

- Delivered Tier 2 field, desktop, and site support for a major mutual insurance organization while managing incidents and assigned work in ServiceNow.
- Installed, configured, tested, supported, and decommissioned agency technology environments including PCs, printers, telephony, switches, wireless access points, peripherals, and onsite/offsite connectivity.
- Performed endpoint deployment, hardware replacement, software troubleshooting, and network/site installation while maintaining technical documentation, asset records, and lifecycle replacement controls.

Technical Support Analyst (Contract) | Dell EMC | Seattle, WA

2017 - 2019

- Provided advanced Tier 2 technical and application support to 400+ global research and development laboratories for a major commercial transportation organization.
- Built, imaged, deployed, maintained, and troubleshoot standard and high-performance computing systems used by engineering and laboratory teams.
- Diagnosed hardware, software, cabling, peripheral, integration, data-collection, and network-connectivity issues involving scientific instruments and collector PCs; supported license-server administration and specialized engineering applications.
- Resolved a high-visibility connectivity issue involving a high-speed imaging camera and its data-collection system, and documented repeatable troubleshooting work.

Computer Technician (Contract) | Digital Intelligence Systems (DISYS) | Seattle, WA

2013 - 2017

- Provided advanced technical support in specialized R&D environments supporting complex engineering workflows and specialty computing equipment.
- Imaged, staged, configured, deployed, and maintained systems used in demanding operating environments; supported endpoint lifecycle, standardized builds, asset control, software troubleshooting, and escalation work.
- Served as backup to the onsite lead and imaged/staged 70+ systems in 3.5 days while preserving configuration accuracy.

IT Service Desk Technician | TrueBlue, Inc. | Tacoma, WA

2008 - 2012

- Provided remote desktop, application, and technical support to satellite branches across TrueBlue temporary-labor brands; troubleshoot workstation, peripheral, connectivity, and business-application issues.
- Managed incidents, tasks, service requests, escalations, and hardware assets using LabPro2000 and later iET while working within service-level expectations.
- Identified an HTML scripting defect that opened an email window instead of routing users to an internal SharePoint support page; more than 30 branches had been affected.

ADDITIONAL QUALIFICATIONS

EDUCATION

Bachelor of Science in IT - Software Development
Western Governors University | Seattle, WA

HARDWARE EXPERIENCE

Built, upgraded, and maintained personal desktop PCs since 1997 and serviced personal laptops since 2013, including component replacement, OS recovery, driver repair, and peripheral support.

CERTIFICATIONS

Previously held: CompTIA A+ | Network+ | Security+ | Project+
